Width
Full Raise
Fully Lowered
Weight Capacity
$\frac{\text { GL-1 }}{90 "}$
48"
33"
7-1/4"
$1,000 \mathrm{lbs}$

## Inspection upon receipt of the lift

1. Always inspect the lift for freight damage and make note of any damage on the bill of lading.
2. In case of freight damage, call the truck line immediately and report the damage as a freight claim.

## Final Set-Up for model GL-1

This lift is more than $90 \%$ factory pre-assembled. The following steps will guide you through the final set-up.

1. Unpack the lift from the shipping skid. With the lift table up side down, connect the air hose to the air cylinder (Part \# 26).
2. After tightening the hose to the cylinder, flip the lift over with the table surface up.
3. Connect the other end of the air hose to the foot-operated valve. Then connect the footoperated valve to 100 PSI air supply. DO NOT USE AIR SUPPLY WITH PRESSURE MORE THAN 100 PSI.
4. Release the safety bar by pushing the handle down. Operate the foot valve by stepping on the foot pad forward to raise the lift. The safety bar should engage the ladder automatically while lift is rising. Step on the footpad again to set the pad in middle position to stop the lift when it reaches the desired height. ALWAYS LOWER LIFT IN THE NEAREST LOCKED POSITION BEFORE BEGINNING WORK. NEVER USE THE LIFT UNLESS YOU ARE IN A LOCKED POSITION. The lift should never be left unattended while attached to air pressure. Disconnect the air pressure when lift is not attended by qualified persons.
5. Install the approach ramp by dropping it into the holes punched on the rear edge of the table.

## The final Set-Up for the GL-1 model is complete

## Final Set-Up for model GL-1

After you finished the steps for the GL-1
7. Run the Extension panel tubes (Total Three, Part \# 58) through the holes on the side of the table. Install the side extensions onto the protruding tubes. Using the clips supplied (part \# 59) to secure the tubes.
8. Drop the ramps for the side extensions in place as shown above.
9. Run the Stabilizing tube through the square tube in the bottom of the lift. Secure it with screws supplied (parts \# 64)
